

FUN AT HOME

SATURDAY

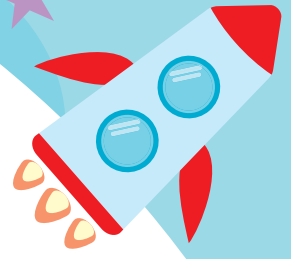

My Week Tree

Colour the wooden boards on the tree. Then, write the names of the days of the week on them with a sketch pen. See the sample picture for reference.

Paper Plate Sun

Make a bright summer sun by following these steps:

- Take a paper plate. Colour both its sides yellow and allow to dry.
- With the help of an adult, cut and paste eyes, nose and mouth of different colours of craft paper. You can also paint them, if you wish to.
- Cut paper strips of different colours.
- Paste the strips on the back side of the sun's face to make its rays.

Your summer sun is ready to shine!

Know This

The sun shines only during the day. It gives us heat and light.
